

If you are either a

### **Recently Graduated / Junior Engineer (m/f)**

- with a civil engineering background, specialized in the fields of sanitary engineering / water management
- with good knowledge of languages (fluent in German and English - reading and writing- and high level French and/or Spanish)
- experienced in working abroad (during your university studies you have already gathered experience in working abroad or you have written your thesis in a foreign country)
- interested to work in an international team in overseas countries and
- flexible and locally independent

we will be highly pleased to receive your application.

With the two-year Junior Programme (one to two positions per year), Pöyry Environment offers you

- the opportunity to work in an international Consulting Company
- the possibility to execute interesting project-related missions in different countries abroad (you will spend 70% - 80% of your trainee period in overseas countries and some 20% - 30% in our headquarter in Germany)
- to widen your experiences in executing water supply, sanitation and waste projects with special regard to the preparation of final designs and supervision of works
